

MONSTERS ON A MISSION!!

Class Activity – Poster Design

It is really important that we are all recycling our food waste whether we are at home, in the classroom or in the canteen.

Your very own special mission is to design a poster to put up in your kitchen at home to remind your family about the importance of recycling food waste.

Your poster should aim to show the following:

- Your monster
- The monster's mission statement
"Feed me your food waste to help save the planet from climate change."
- Explain that food waste is recycled into energy.
- List the things your monster can eat – and remember, no packaging or liquids:

We would love to see any great photos of posters, if you could like to send them to recycle@dacorum.gov.uk
